Educators who are under chronic stress, which may be increased because of COVID-19. The Center for Health and Health Care in Schools has tips for school leaders to help address teacher wellness and care. Download a PDF copy of the resource.

Fueling Georgia’s Future

December Harvest of the Month

LETTUCE

Georgia Grown Resources

Classroom Resources: Resources include downloadable activity books, bulletin board kits, commodity fun facts, Georgia Grown videos and more, from Georgia Grown.

Funding Opportunities

Get a Salad Bar in Your School

Does your school have a salad bar? If not, apply for a grant from Salad Bars to Schools. Applications are accepted year-round and are reviewed in the order they are received. It may take up to 12-14 months to fund a school salad bar. To qualify, the salad bar must be part of the reimbursable meal served in your district.

Target Field Trip Grants

Since 2007, the Target Company has donated more than $16 million in grants to the improvement of education. Each Target store in the United States will award three Target Field Trip Grants, enabling one in 25 schools throughout the country to send a classroom on a field trip.

Firehouse Subs Public Safety Foundation AED Grants

- Portal reopens January 1, 2021

Click here to learn more.

Apply for a Grant to Improve Your Community

If you have a plan for helping your community but need some money to get started, Walmart may be able to help. Walmart’s Local Community Grant Program awards grants to eligible kindergarten-through-12th grade public, private or charter schools. Proposed projects could be a soup kitchen, food pantry, clothing closet or other activities that benefit the community at large. The deadline to apply is December 31, 2020. Visit the Local Community Grant Program for a complete list of eligibility requirements and areas of funding.

NASN Research Grants

Purpose: To encourage and support research regarding school nursing and health of school aged children.

To advance and fund quality school nursing practice and school-affiliated delivery of healthcare.

Youth Mental Health Awareness Campaign

DBHDD launched our youth mental health awareness campaign "Free Your Feels" in September during National Suicide Prevention Awareness Month. Free Your Feels (FYF) encourages Georgia’s young people to explore their real feelings and share them fearlessly. With our children and teens empowered to speak out and express their real feelings, adults and peers tuned in and listening judgment-free, and everyone connected to available resources, we will see a healthier, thriving generation.

Recently, the FYF campaign released two public service announcements (PSA) in collaboration with VOX ATL teens to help further the public education campaign. One PSA is geared towards the Adult audience and the other towards the Youth audience.

Visit the Free Your Feels website which will house a collection of resources from different organizations and agencies, and will include ready-to-use editable graphics so you can easily promote and share messaging!

Follow @free.your.feels on Instagram, where we will share mental health materials. Share posts on your own account and/or ask people in your networks to follow and help spread the message far and wide!

**Characteristics of Preschool Special Education Services and Educators**

New research helps fill the information gap on services for preschool children with disabilities. The Individuals with Disabilities Education Act and federal policy guidance support early identification and intervention for young children with disabilities and encourage the use of inclusive settings to serve them.

On National Special Education Day, we are proud to highlight a comprehensive nationwide study on services for children ages 3 to 5 with disabilities. Our experts conducted this research for the U.S. Department of Education’s Institute of Education Sciences to shed light on how young children with disabilities are served. These data can inform researchers, practitioners, and policymakers about the structure of programs for preschool children with disabilities, the prevalence of inclusive settings, use of curricula and interventions, and the characteristics of and supports provided to teaching staff.

Read the report on Characteristics of Preschool Special Education Services and Educators to get the answers to these questions and more:

- How are preschool education programs structured?
- In what environments are 3- to 5-year-olds with disabilities served?
- What is the average percentage of children with disabilities that receive most special education and related services in inclusive classrooms?
- What are the most common barriers to inclusion?
- What curricula, programs, strategies, and practices are used to support instruction of preschool children with disabilities?
